Why should I make the change from alcohol based products?

Alcohol does not kill spores - alcohol can actually stimulate the growth of spores.

Alcohol gels are usually not hand friendly and can only be used a few times a day.

Alcohol & IPA (Isopropyl Alcohol) are **not** climate friendly.

Alcohol evaporates quickly after application.

Alcohol is highly flammable, requiring special storage, handling and disposal procedures.

What are the benefits of Enduro Hand Sanitiser?

Enduro Hand Sanitiser is tested and proven to be sporicidally active against *C. difficile*.

Enduro Hand Sanitiser is kind to skin and preserves natural skin oils.

Enduro Hand Sanitiser has no adverse effects on the environment.

Enduro Hand Sanitiser remains on the skin and is proven to continue to work 2 hours after application.

Enduro Hand Sanitiser is non-flammable and requires no Hazard labelling.
